LinkedIn: which method gives the most reach

Facts from large studies of LinkedIn company pages. Engagement rate = reactions, comments, reposts and clicks as a share of impressions.

Engagement by post type [1]

Pages with 1K to 5K followers: impressions per post [1]

9x to 72x

more impressions per 1,000 followers for three employee profiles than for the company page of the same business (one company's own data, Q3 2025) [2]

10%+

of Zoom's followers subscribed to its newsletter in the first 24 hours (early adopter, 2022) [3]

$10 a day

minimum for LinkedIn ads; average click costs $5.26 to $9.80, so organic comes first [5]

What the data says: native documents (PDF carousels) and multi-image posts get the most engagement; link posts get the least, so we keep links out of the post text where possible. Employee profiles reach far more people than a company page, so the team shares and comments on every page post. Newsletters notify followers directly, so they work like a subscriber list on LinkedIn.

[1] Socialinsider, LinkedIn Benchmarks, socialinsider.io/blog/linkedin-study/ (2,450,610 organic posts from 26,114 company pages with 1K to 1M followers; the article's period label is inconsistent, so figures are shown as 2025). Our page has 477 followers, below the smallest group studied, so the numbers are a guide, not a forecast. [2] Refine Labs, Employee Profiles Outperform Brand Pages on LinkedIn, refinelabs.com (17 February 2026): three employee profiles vs. one brand page, the company's own accounts, no independent check. [3] Social Media Today, LinkedIn Adds Newsletters for Company Pages, socialmediatoday.com (22 March 2022). [5] Benly, LinkedIn Ads Cost 2026, benly.ai/learn/linkedin-ads/linkedin-ads-cost (updated 24 March 2026; underlying data source not named).

LinkedIn: all methods and tasks

Every task is backed by data where data exists. Where no figure was found, the table says so.

Method	Our task	What the facts say	Cost
Native document posts (PDF carousels)	2 a month: tips, services, case ideas	Highest engagement: 7.00% [1]; most impressions on 1K to 5K pages: 525 per post [1]	Free
Multi-image posts	1 a month: team, events	Second highest engagement: 6.45% [1]	Free
Video	1 a month (suggested)	6.00% engagement [1]; video views fell about 36% year on year [1]	Free (time)
Image posts	1 a week: values, services	5.30% engagement [1]	Free
Text posts and polls	Questions to CTOs and HR heads	Text 4.50%, poll 4.20% [1]	Free
Link posts to chautech.de	Few, only when needed	Lowest engagement: 3.25% [1]	Free
LinkedIn Newsletter	1 a month to start, DACH CTOs and HR heads	Followers get a one-time alert for each issue [3]; Zoom: 10%+ of followers subscribed in 24 hours [3]; frequency can be daily, weekly, biweekly or monthly [4]	Free (time)
Employee sharing	Team reacts, comments and reposts each page post from own profiles	9x to 72x more impressions per 1,000 followers than the brand page [2]	Free (time)
Events and Live	1 webinar a quarter (suggested)	Host sees registrants' names and job titles; LinkedIn sends reminders; promote 2 to 3 weeks ahead [6]; no attendance figure found; Live needs an outside streaming tool [6]	Free (time)
Connection requests with a note	Day 1 of the outreach sequence	ChauTech's own process (connection, then email, then call); no figure found	Sales Navigator already in use
Invite to follow, Services section	Invite connections monthly; add our services to the page	Both are offered in the page admin dashboard; no figures found	Free
Sponsored Content, Lead Gen Forms	Test only after organic reach is steady	From $10 a day; click $5.26 to $9.80; B2B cost per lead usually $75 to $200 [5]	From about $10 a day

Request to the CEO: approve all tasks above, including the LinkedIn Newsletter. Most are free (working time). The only paid item is an optional ad test after organic reach is steady. Goal: grow followers from 465 to 1,000+ in about 6 weeks, aimed at CTOs, HR Directors and tech professionals in DACH.
