Why Facebook Groups matter for ChauTech

Facts and figures on Facebook Groups, with the source named for each number [1] [2].

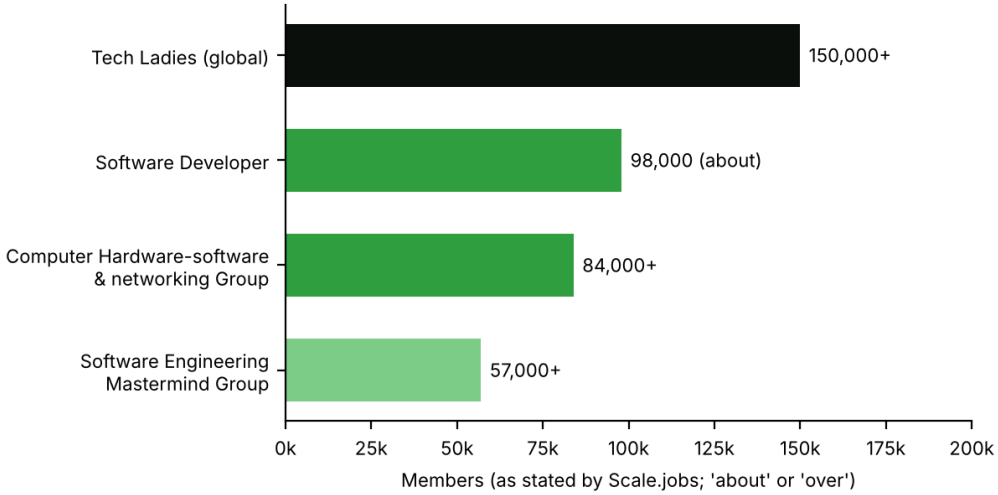

1.2 billion
Monthly active Facebook Groups worldwide (2022), up 12% on the year before [2].

65%
of US adults are in at least one Facebook Group, up from 60% in 2021 [2].

50%
of European group members are in fitness and wellness groups. IT groups are a smaller part, so we must choose carefully [2].

15%
of group members are outside the USA. The rest are mainly in the USA [2].

Biggest tech groups named in the source

What this means for us

- **Groups are big and active:** single IT groups reach 57,000 to 150,000 members. A good post there can reach far more people than our own Page can today.
- **They hold our buyers and talent:** software engineers, IT managers and job seekers are already there, which supports both our IT services and recruiting.
- **Mostly global or US-focused:** the named groups do not state a country, and country-specific groups appear only for USA, Canada and UK [1].
- **Be useful, not salesy:** post tips, answer questions, share jobs. Many groups restrict promotional posts.
- **Choose IT groups only:** since half of European members join fitness groups, we search with IT words (see page 2).

Group list, country gap and plan

What the sources give us, what they do not, and how we close the gap.

Group named in source [1]	Members	Region	How ChauTech uses it
Software Developer	About 98,000	Not stated	Tips on AI and cloud; developer recruiting
Computer Hardware-software & networking Group	Over 84,000	Not stated	IT consulting topics
Software Engineering Mastermind Group	Over 57,000	Not stated	Engineering articles; hiring posts
Tech Ladies (women in tech)	Over 150,000	Global	Employer branding; hiring posts
IT Jobs in Canada, USA, UK, and more	Not stated	Canada, USA, UK	Staffing and contract roles
AI & Data Science Jobs USA	Not stated (typical range 50,000-100,000)	USA	AI solutions, AI hiring
Tech Jobs: San Francisco Bay Area & Silicon Valley	Not stated	USA (Bay Area)	Later phase, USA market
Remote Work & Freelance Tech Jobs	Not stated	Remote	Freelancer and contractor sourcing

The gap we must be honest about

- Neither source gives the **number of Facebook Groups per country**. Facebook does not publish it.
- Neither source lists groups for **Germany, Switzerland or Austria**.
- The 1.2 billion and Europe figures come from a page that does not link each number to its source [2]. Treat them as indicative.
- Member counts are rounded ('about', 'over') [1].

How we close it (2 weeks)

- Search Facebook with IT words per country, e.g. IT Jobs Switzerland, Softwareentwickler Deutschland, IT Freelancer Austria.
- Open filter **Groups**. Record name, link, member count and rules in an English Excel sheet.
- Join 5 groups a week, starting with Switzerland and Austria, then Germany.
- Read rules first, then post one helpful tip per week per group.
- Report the real group counts to the CEO after 2 weeks.
